## PENDULUM VIBRATOR HP-360

The most versatile vibrator in the market, it only needs 70 HP of power, allows both the back and the front of the tractor.

For large, medium and small farms, together with the collection tray this collector team is one of the most simple, effective and economical. It allows work with the minimum number of workers and take greater average olive kg per person.

In the intensive and super-intensive farms we obtain very good yields since we don't need maneuver with the tractor, because is telescopic and it incorporates in the arm 360° of spin, unique in the market, it can works in two row at the same time without move the tractor from the middle of the street.

In the traditional olive grove, it is the only that allows collect several feet from the same position without move the tractor thanks to the innovator system of rotation, it spins the vibrator head inside the olive tree till 360°, or the traditional joystick system on the vibrator head for the manual use.

With the new system of variable amplitude it places as one of the most complete teams vibration in the market.

In the 12 years that we are manufacturing it, we do not stop innovating in this machine being the only rear vibrator manufactured in Spain with a guaranteed success in the national and International market.

### TECHNICAL CHARACTERISTICS:

- Orbital vibration and variable amplitude with regulator.
- Head manufactured in veneer Domex solderless.
- Pump and piston engine.
- Double sense of vibration and engine braking.
- Quick hitch to the bucket.
- Multiconnector of hydraulic sockets.
- Auto tightening clamp with regulation pressure.
- Independent three-point jaws.
- Working wheels.
- Joystick monocontrol.

- 360 ° arm rotation.
- Remote control.

### GATHERER TRAY OPTION:

- Surface sliding of rubber with high rate of rubbing
- Storage capacity of 1000 kg
- Eases the burden with blankets.
- Minimum manpower.
- It adapts to any type of planting.
- Indicated to accompany any system demolition.
